

fall 2021 lecture series

In November and December 2021, KU Leuven's International Center of Urbanism, Department of Architecture (Faculty of Engineering Science) and CIVA (Brussels) will co-sponsor a virtual lecture series, *Landscape Architecture Beyond Europe*. There will be five lectures by renowned practices from Australia, South Africa, Brazil, Thailand and the United States. The aim is to broaden the exposure of worldwide practices and stimulate cross-cultural discussions on some of the most pressing issues of today and the ways in which landscape architecture responds across geographies.
